

Yacimientos Mineros de Agua de Dionisio

Corporate Presentation

ABOUT US

Y.M.A.D. has been operating for more than 50 years creating production value for Argentina. Since 1953, Y.M.A.D., supported by the involvement of the Catamarca Government and the National University of Tucuman, conducts the activities of exploration, mine production, refinement and commercialization of the minerals once produced in the province of Catamarca.

Ymad's board of directors is led by four executives as directors representing Catamarca province and the National University of Tucuman, and The Chairman who is appointed by the Catamarca Government

LOCATION OVERVIEW

Yacimientos Mineros de Agua de Dionisio was created under the Act 14.771 with the aim to conduct the activities of prospecting, exploration and exploitation of the existing minerals in the mining concession area of Agua de Dionisio deposit, an area that comprises a portion land of 344 square kilometers, and which is located in Hualfin district, Belen department, Catamarca province.

As it is situated at 2000 – 2.500 meters above the sea level, its weather condition is hard with temperatures that can reach up to 35 degrees in summer and drop to 15 degrees below zero in winter making its surrounding be scarce in vegetation.

PRODUCTION MINING COMMENCEMENT

Once the Farallon Negro Industrial Mining Complex was constructed in 1978, YMAD initiated the gold and silver production stage that continues until today, mining Farallon Negro and Alto La Blenda gold and silver deposits.

Within YMAD's mining concession area, various ore deposits exist, among which, Bajo La Alumbreira is considered to be one of the World's largest gold, silver and molybdenum deposit.

Currently, YMAD's investment projects in its portfolio are: Los Viscos, Rincon Grande and Agua Tapada.

Yacimientos Mineros de Agua de Dionisio

A photograph showing two miners in an industrial setting. They are wearing orange safety suits, orange and yellow hard hats, and respirators. They are positioned behind a metal railing, looking towards the right. The background is a rocky, excavated area.

HOW WE OPERATE

As we consider mining as an activity fully committed to the current norms and respect for the importance of nature and communities, we work for the continuous optimization of the use of the natural resources and green energy by applying strict measures and regulations to protect and preserve the environment.

Additionally, it is worth recalling that safe working environment is also part of YMAD's top priorities, therefore preventive protocols and training courses are implemented to guarantee our workforce the safe and healthy conditions to perform the day-to-day activities on-site.

OUR COMMITMENT

In order to make a significance and sustainable contribution to the development of the local region, we are committed to work side-by-side with local communities and support social initiatives in the scope of education, infrastructure and health services as they are fundamental to generate economic growth and preserve the environment.

Yacimientos Mineros de Agua de Dionisio

OUR VISION

To become a World leading mining company by being committed to innovate and adopt new technologies to strengthen our duties and to mitigate environmental impact with the aim to achieve greater benefits for the country´s economy and future generations.
